

TITLE PAGE

- **Problem Statement ID** – SIH25034
- **Problem Statement Title** – AI-Based Internship Recommendation Engine For PM Internship Scheme
- **Theme** – Smart Education
- **PS Category** - Software
- **TeamID-**
- **Team Name** - Intervision AI

Problem Resolution :

- Finding internships is overwhelming. Students face massive, confusing job boards with too many options.
- It's inefficient. This leads to wasted time and effort on irrelevant applications.
- An AI tool simplifies the search. It automates the process by understanding a student's profile.
- It provides a personalized list. The tool offers a few highly relevant opportunities, making the search easy and effective.

Innovation and Uniqueness of the Solution :

- Traditional internship searches are overwhelming and inefficient.
- Students, especially those with limited experience, get confused and waste time.
- This results in misaligned applications and missed opportunities..
- A user-friendly AI tool simplifies the search process.
- It analyzes a student's profile to understand their needs.
- It provides a personalized list of only the most relevant internships.

Web-only PM Internship Scheme

AI-Based Internship Recommendation Engine

Hybrid voice + text input, smart location, confidence scoring, and bookmarking — designed for students finding the right internship track.

Get recommendations → No signup required

Your skills: Add skills students want to highlight (press Enter to add)

Voice + Text: Hands-free forms

Smart Location: Auto detects city

Bookmarks: Local & private

Internship Recommendation Engine

Your skills: e.g. React, Python, SQL Add

Interests: Interests

Location: Location

Analyze your resume: Upload Resume Speak

Paste your resume text or speak...

Get recommendations

Confidence score based on provided skills and resume keywords — recommendations also consider representation and internship capacity on the backend.

Recommendations

No recommendations yet. Upload your resume or search to begin.

Career Guidance Mode

e.g., How to improve my resume for a React internship? Ask

Product Status :

- 60% of the product built is **complete**.
- Remaining development is in progress.
- **Machine Learning (ML)** is **deployed** in Backend.
- Testing and Validation are underway.

SWOT Analysis :

Feasibility :

- **Technical:** Mobile UI, easy integration
- **Operational:** Simple, low-maintenance, user-friendly
- **Economic:** Yes. It's low-cost. Uses open-source tools and avoids expensive, complex AI.

Viability :

- **Value for all:** better matches for students, faster shortlisting for employers, actionable analytics for institutes/govt.
- **Scalable & low-cost:** cloud-native, mobile-first; ready for millions of users.
- **Policy-aligned:** supports PMIS goals; DPDP-compliant for long-term adoption.

Supporting Facts for Feasibility and Viability :

- ★ **India Skills Report 2025** shows only **50%** of graduates are employable. Our AI engine bridges this skill gap by matching students with internships that build in-demand skills.
- ★ **NASSCOM 2024** highlights **AI & Data Analytics** as fastest-growing sectors, proving both the demand for skilled interns and the technical feasibility of building such a platform.

Societal Impact :

- Bridges education ↔ industry skill gaps
- Improves student employability & opportunity
- Democratizes access across regions and languages

Research:

1. Program & Market Need

- **PMIS:** 1 crore internships; 12-month program; $\geq 50\%$
- **Fragmented channels:** AICTE + TULIP weak discovery & match quality.

2. Technology Research

- **Retrieve rank** boosts large-scale matching efficiency.
- **Cold-start:** use hybrid (content + collaborative + knowledge-based) models.
- **Uncertain users adopt more** with clear, explainable **AI suggestions** and good UX.

3. Fairness & Multi-stakeholder Constraints

- **Fairness balance:** Optimize for both applicants & employers; build audits/metrics in from day one.
- **Multi-sided fairness:** Don't overfit to students or hosts-apply exposure/diversity constraints in ranking.

4. Data & Compliance

- **DPDP Act, 2023:** Consent must be free, specific, informed, unambiguous—applies to profiles, eKYC, and training logs.

5. Ecosystem Signals

- **Demand signal:** “1 crore by 2025” push; ~54 lakh by 2024
→ track conversion
